

Lagendijk Hydraulic Knuckle Boom Crane

Type: LKB 10.0/ 15.0-10.0

Lagendijk proudly reports to have announced the order for the construction of a knuckle boom crane suited for subsea works at ca. 100 meter below surface.

The crane will be mounted on a supplier vessel in Brazilian waters and shall be equipped with an air-conditioned control cabin. This knuckle boom type has a lifting capacity of SWL10 tons at 15 meter, has been designed to meet all requirements in sea state 4 and can be operated in marine harsh environment between -20°C and +40°C.

ABS class requirements are applicable and the project has been scheduled for delivery Spring this year.
